Positioning Statement

New Harman Kardon aftermarket SPEAKERS family developed to maintain aftermarket Harman Kardon brand continuity, as well as to offer more choices & solutions to consumers. The whole series use recycle material and are PVC free to implement Harman eco-friendly goal

The NEW family will include a range of standard sizes – 6.5" Coax, 6.5" Component, .75" Soft Dome Tweeter, & 6"x9" full-range w/ 2.75" Soft Dome Coax (to 3") mid-range for Chrysler/ Chevrolet/ Dodge/ Toyota factory fit to meet audiophiles' expectation.

And the family will be engineered with Harman patented Plus One woofer cone, edge-driven dome tweeter, Hi-Res technology, and I-mount & Starfish tweeter kit to maximize product performance and fitment.

Key Features

- Plus-One™ Woofer Cone
- Edge-driven Textile Tweeter
- Hi-Res Audio
- Uni-Pivot and Angled Tweeter
- I-Mount Tweeter Installation Kit
- Starfish™ Tweeter Mounts
- 0 or +3dB Tweeter Attenuation
- 3-way Component Upgradability
- Environmentally friendly & recyclable material to product & package.
- QR code OM on Beauty Box

Retail Price

\$119.95-\$379.95

Customer Benefits

- Environment friendly
- Competitive price level
- Premium sound performance
- Fashion & up to date brand design
- User friendly installation & seamlessly fitment
- High quality and excellent degree of durability

MARKETING INFO

The Harman/Kardon Series Speakers are designed for ultimate audio luxury, featuring high-resolution audio and enhanced by glass fiber woofer cones with Plus One™ technology for a robust and precise sound experience. Edge-driven textile tweeters deliver smooth and detailed high frequencies, ensuring an exceptional listening experience. Crafted using Post-Consumer Recycled (PCR) materials, PCV free material, recycle packaging material, as green products, ensure superior audio quality with minimal environmental impact.

- Patented Plus One™ Glass Fiber Woofer Cone

Patented (US patent #7,548,631) Plus One™ cones leverage lighter weight and provide more overall speaker-cone area than other speakers for the same size, resulting in higher sensitivity, increased low-frequency output and greater musical character.

- Edge-driven Textile Dome Tweeter to Deliver 40kHz High-Resolution

Edge-driven textile dome tweeters equipped with oversized voice coils deliver unforgettable audio experience with impressive thermal power handling and 40kHz high- resolution. Turn every drive into your personal concert.

- Slim and Smart Crossover Design

Harman/Kardon component systems all have very slim crossovers, which equipped with connection cable for easy installation. The push-button on crossover allows tweeter output level control of 0dB or -3dB to optimize system linearity based on installation location.

- 0dB or -3dB Tweeter Output Level Control

The push-button on the angled tweeter allows tweeter output level control of 0dB or -3dB to optimize system linearity based on installation location.

- Eco-friendly product

Crafted using Post-Consumer Recycled (PCR) materials, PCV free material, recycle packaging material, the Harman Kardon Fit Speaker series delivers superior audio quality while minimizing environmental impact.

- 3-way Upgradability

Harman/Kardon 6-1/2" 2-way component and 6x9" 2-way component system crossovers are equipped with 2-way and 3-way selectivity, providing the flexibility to add the optional 3.5" midrange to create a full 3-way system.
